

194 torfur

Eftirfarandi tafla er samsteypa á dýrleika torfa í *Jarðabók 1861*, *Jarðatali Johnsens 1847* og *Fasteignabókinni 1922*.

Skattagögn Johnsens og forna matsins 1861 eru uppskriftir, sem komnar eru frá eignarrétti löggerninga frá 1096 til 1861. Hins vegar er nýja matið 1861 og matið 1922 sölumöt, ótengd eignarrétti. **Oftast** eru uppskriftirnar frá eignarréttinum samhljóða, villulausar, en sölumöt matsmanna voru fæst með sama hlutfalli milli jarða.

Jarðamötin fyrir skattagögnin 1861 og 1922 voru gerð fyrir skattheimtuna, ekki eignarrétt, engum hugkvæmdist það fyrr en síðar. **Fyrirmæli stjórnvalda til jarðamatsmanna voru að skoða hverja jörð og finna sennilegt söluverð.** Fyrirmælin heimiluðu ekki að torfa væri metin í einu lagi og síðan skipt í hlutfall eignarréttarins. **Fyrirmælin eru tilskipun konungs 27. maí 1848 og lög um fasteignamat, nr. 22/1915, frá 3. nóvember 1915.**
